Viscar Industrial Capacity Limited
Enhancing Performance & Productivity

ADDITIONAL SERVICES

- Field and In-office assessments
- Customised training
- System upgrades (Design and Documentation), redesigns and overhauls support

DELIVERY MODE

- Hybrid learning: In-person & online
- Duration: 4-week intensive program
- Step-by-step guided projects

WHY CHOOSE US?

- Industry-relevant curriculum
- Hands-on ECAD training (EPLAN)
- Expert trainers with real-world experience
- Certification & career advancement support

ABOUT THE COURSE

This program equips learners with the skills to design, implement, and manage electrical systems across residential, commercial, industrial, and renewable energy sectors.

WHAT ARE THE TRAINING AREAS WE WILL COVER?

1. Electrical Systems Design Standards, Codes & Regulations.
2. OEMS.
3. Electrical Systems Design & Implementation Procedures.
4. Design Tools & Best Practices.
5. Beginner to Expert in Design & Implementation of Electrical Systems.

IDEAL FOR

- Plant/Maintenance Managers
- Engineers (Students & Graduates)
- Training Institutions
- OEMs & System Integrators
- Utility/Energy Providers
- Project Managers/Consultants
- Regulators & Compliance Officers

Viscar Industrial Capacity Limited
Enhancing Performance & Productivity

WHAT YOU'LL LEARN TO DESIGN

- Main LV Switchboard
- Power Factor Correction Panel
- Changeover Panel
- Sub Distribution Board
- Motor Control Center

Viscar Industrial Capacity Limited
Enhancing Performance & Productivity

TRAINING PACKAGE

Our program is structured in progressive stages, ensuring you build competence step by step:

FOUNDATION

- Understand electrical systems and design basics
- Learn equipment types, protection methods & safety codes
- Develop your first simple schematics in ECAD

APPLICATION

- Perform load analysis, cable sizing & routing
- Design discrete electrical control systems
- Create detailed SLDs, MLDs & layouts (2D & 3D)

MASTERY

- Design programmable control systems (PLC-based)
- Integrate automation & renewable energy systems
- Generate full BOMs, documentation, and project-ready drawings
- Manage real-world design projects from concept to as-built stage
